Robert,

Here is an update. Note the steam numbers are round estimates based upon coal usage. Other numbers come from commodity reports. Where is this data being used?

Annual Y-12 Site Usage for Years 2006 - 2008

	Annual Power Usage (MWh)	Annual Gross Steam Produced (1000 lb)	Potable Water Annual Consumption (1000 gal)
FY2006	272,245	1,176,000	1,666,647
FY2007	260,730	1,131,000	806,190
FY2008	252,682	1,045,000	1,140,618

Rosanne,

3/24/2009

Can you help update this chart? I need an update by noon Tuesday (3/24/09).

Thanks
Robert

Robert,

EH has commented that the data in the table, below, is dated. I sort of agree with them. Would it be possible to update this information?

Table 5.3.1-1. Annual Site Utility Usage for Years 1998-2000.

	Annual Power Usage (MWh)	Annual Gross Steam Produced (1000 lb)	Potable Water Annual Consumption (1000 gal)
1998	377,140	1,616,235	1,522,000
1999	357,858	1,428,185	1,579,000
2000	349,251	1,422,285	1,734,000

Thank you,

Al Feldt
